

**BRAIN  
& BODY  
LAB**

**Children in foster care often suffer from physical symptoms related to their TRAUMA! Stomachaches, headaches, diarrhea, and vomiting can all be associated with our children's trauma. Join us for this OUTSTANDING FREE Virtual Webinar for a better understanding of why this happens and how we can support our children as caregivers.**

**Training Certification Available Upon Completion**

**September 27<sup>th</sup>, 2021**

**12:00pm to 1:30pm**

Dr. Bridget Callaghan is an **Assistant Professor of Psychology at UCLA** who studies interactions between mental and physical health across development. She received her bachelor's degree in Psychology, her master's in clinical psychology, and her Ph.D. at the University of New South Wales, in Australia. She has worked clinically in the field of developmental psychology and completed her postdoctoral training at Columbia University in New York in 2019. Dr. Callaghan's research has been generously funded through the National Institutes of Mental Health, Brain Behavior Research Foundation, and National Health and Medical Research Council of Australia. She has active collaborations with researchers at New York University, and the University of New South Wales and Sydney Children's Hospital in Australia.
